k. **Description of Request:** Idaho Power Company (licensee) proposes to refurbish the three turbine generating units sequentially over the course of approximately three years. Under its proposed schedule to perform the maintenance work, the licensee would take turbine generating unit 1 offline in October 2022. Anticipating that the maintenance work for each turbine generating unit would take approximately one year to complete, the licensee plans to take turbine generating units 2 and 3 offline for refurbishment in October 2023 and October 2024, respectively. All proposed activity would occur in the powerhouse, with no ground disturbing activity or in water work necessary. A single turbine generating unit would be offline periodically during the refurbishment period. Therefore, the proposal may result in an increased flow over the spillway while the work is being done, depending on whether the inflow to the project exceeds the hydraulic capacity of the two online units. Under the proposal, the total authorized capacity of the project would remain at 90,000 horsepower (67,500 kilowatts) as defined by current section 11.1 of the Commission's regulations, and the hydraulic capacity would increase from 13,704 to 14,115 cubic feet per second.

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. **Filing and Service of Documents:** Any filing must (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2)
